JUST SOME OF OUR INNOVATORS

While New Mexico is home to several well-established technology companies including Facebook and Intel, where we thrive is in our rapidly-expanding tech startups. Many small tech companies have found enormous success in our state. From solar glitter to interactive walls, many cutting-edge inventions have started right here in New Mexico. Some recent examples include:

ideum **Ideum** makes interactive multi-touch tables and video display walls for museums, businesses, and institutions

3D GLASS SOLUTIONS **3D Glass Solutions** fabricates electronic packages and devices using photo-definable glass ceramics.

indica labs **Indica Labs** generates software development for cancer research and other medical applications.

RS21 is a data science, visualization company that uses data and highly intuitive platforms to solve complex problems like crime, climate resilience, terrorism and population health problems.

Descartes Labs is a data company using its data refinery for satellite imagery, allowing them to process images from the major NASA and ESA satellite constellations at scale.

RESEARCH INSTITUTIONS

**Sandia
National
Laboratories**

New Mexico has been at the center of research for decades. Our research institutions are among the top in the world. New Mexico provides virtually unmatched opportunity for business and industry to collaborate with world class scientific and research institutions; and this has been a foundation of our innovation ecosystem in the state.
